

Swiss worldwide leading pharmaceutical company, specialized in R&D, production and sale of innovative solutions, is seeking a:

International Clinical Project Manager Senior M/W Permanent Position

Within the Full Development department and the Development operations and clinical development service, you will supervise and coordinate whole clinical projects with the support of the clinical study team and internal and external experts.

Your missions:

- Coordinate and lead clinical studies : writing and/or reviewing the clinical protocol for its feasibility and appropriateness within the early plan of the project,
- Manage and supervise your CRA team.
- Select and be the communication point for investigators, clinical administrators and subcontractors (CRO, experts...),
- Identify main milestones and establish budget and timelines for the study conduct together with the study team. Establish a detailed planning of clinical project,
- Build, follow-up and close out study Budget following internal templates and instructions and according to the initially approved budget,
- Ensure clinical data reporting and to coordinate data management process,
- Collaborate with other department members to promote harmonization of all processes and procedures.

You hold MD, PharD, PhD or MS diploma and you have a confirmed experience as project manager in clinical development, related to international studies, and proven experience in line management. An excellent leadership, a very good relationship, some organizational abilities and a good team spirit are required. This challenging position will give you the opportunity to lead innovative projects and develop your competencies on different assignments.
Fluent English, French speaking is a plus.

This position is located South of France.

To apply, upload your application (cover letter and resume) with **ref. CP1606** to:
